

SPECIALISTS IN THE TECHNICAL CONTROL OF ELECTRICITY

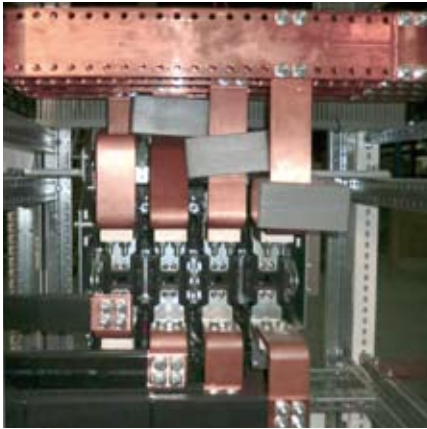

Electricity is an essential force which powers the best projects. Great challenges require precision, skill, knowledge, and, above all, experience. The excellent quality of the projects we have carried out since the mid-1990s leave the results of our work are clear to see.

We are specialists in **electrical panels for large buildings with high power**. We guarantee that electricity management holds no secrets from us.

Main Switchboard at the Regional Blood Centre (Coimbra)

Rating 2500A
8 Motorised mechanisms
Entries for 2 transformers in parallel
2 interconnecting busbars
1 Generator set connection
Control through TCM (Technical Control Management)
Dimensions: L 6.2m, D 0.6m
Brand: HAGER

Load Transfer Panel at the Regional Blood Centre (Coimbra)

630A motorised load transfer panel
Mains and generator set connections,
to feed a pump station
Dimensions: L 1.2m, D 0.4m, H 2.2m
Brand: HAGER

PT switchboard at the Secil factory (Montijo)

Rating 3200 A
Output breaker 2500A
Dimensions: L 1.2m, D 0.4m, H 2.2m
Brand: SCHNEIDER

Distribution switchboard at the Secil factory (Montijo)

Rating 3200 A
Dimensions: L 4.8m, D 0.4m, H 2.2m
Brand: SCHNEIDER

Our experience with electrical systems in different sized projects, in a range of sectors and countries, means we can take on any project, with the safety and confidence of those whose work has been recognised and recommended.

As well as many different electrical systems in Portugal, other projects completed by us are fully operational in **Saudi Arabia, Algeria, Angola and France.**

SWITCHBOARDS

Essential for electricity management, switchboards are the basic component for stable electrical systems and controlling energy flows. We know how they work, and have an overall vision of their real importance for businesses' success.

ELECTRICAL PROJECTS AND WIRING

We fully apply all our know how to the most demanding of projects. Using all of our experience is essential to guaranteeing results which are always higher than average.

RENEWABLE ENERGIES

The current trend towards more and more sustainable energy use and management is something we have taken on since the beginning, and is a commitment we have for the future. We believe that we can reduce our environmental footprint by using clean, reliable and up-to-date technology, and we know how to get the most out of their use.

Regardless of the sector, controlling electricity carefully and skilfully is essential for a project's profitability and reliability. The following companies already trust our services:

FRANÇA	COIMBRA	SINTRA	CANTANHEDE	LEIRIA	LISBOA	LEIRIA	LEIRIA	MONTIJO	FIG. DOS VINHOS
